PROFESSIONAL SUMMARY

Frontend Engineer with 6+ years of experience building scalable, product-focused web applications across real estate, booking, content, and business platforms. Specialized in React, Next.js, TypeScript, frontend architecture, performance, accessibility, and responsive UX, with hands-on backend experience in Node.js, REST APIs, headless CMSs, and third-party integrations. Collaborates closely with product and backend teams to deliver maintainable user experiences.

PROFESSIONAL EXPERIENCE

Web Developer
Sep 2019 - Present

Caribe Media

- Develop and maintain responsive web platforms for clients across multiple business sectors using JavaScript, SCSS, Bootstrap, WordPress, and Elementor.
- Improve search visibility and page-load performance by applying SEO, frontend optimization, and code-quality best practices.
- Maintain performance and code-quality standards across both custom-coded websites and visual-builder implementations.

Full-Stack Developer
Jan 2025 - Jan 2026

IT Business Dominicana

- Built scalable interfaces for a real estate platform with Next.js, TypeScript, and Tailwind CSS, including internal dashboards, advanced filtering, and secure authentication flows.
- Integrated interactive property maps through the Google Maps API and managed client state and data fetching with Zustand and SWR.
- Improved performance, accessibility, and responsive behavior across key flows and delivered polished micro-interactions with Framer Motion.

Full-Stack Developer
May 2024 - Dec 2024

Spedis

- Designed and delivered a property-booking platform and corporate blog across frontend and backend using Next.js, Node.js, and TypeScript.
- Integrated Stripe, PayPal, and Smoobu to support booking and payment workflows.
- Built a structured Sanity headless CMS with schema modeling, GROQ queries, preview configuration, and editorial content workflows.
- Applied modular architecture and performance-focused frontend practices to improve maintainability and user experience.
